to

My Parents

Clarence Wilman Hatheway (1906–1978)

Marie Elizabeth Sisto Hatheway (1908–1987)

who raised me to embrace a devotion to learning

to

My Wife

Diane Margaret Rydell Hatheway, BA, MA

who shares my love of and fascination with history

and exploratory travel,

and who devoted much editorial energy to this book

and to

Willard C. Lacy, PhD, PGeol, PE

Professor Emeritus, Geological Engineering

University of Arizona

and

the late Richard L. Sloane, MS, PE

Professor of Civil Engineering

University of Arizona

both who taught always to turn

to the literature first,

then to spade the ground diligently for

first-hand site characterization truths

Contents

Foreword	xxix
Acknowledgments.....	xxx
Author	xxxiii
Introduction.....	xxxv

PART I Background Information

Chapter 1 History of Manufactured Gas and Coal-Tar Activities	3
Today's Environmental Concern	3
Estimated Number of Former Gas-Manufacturing and Related Sites in the United States and the British Isles	4
Frequency of Discovery Today.....	10
Present-Day Environmental Concerns	12
Origin of Manufactured Gas	14
Gas Plant Architecture and Layout	17
Locating Former Manufactured Gas Plants	20
Franchises and Other Public Certifications of the Manufactured Gas Industry	23
Gas Company Rates to Consumers	24
Competition and Consolidation.....	25
Varieties of Gas Companies and Gas Company Names	26
Municipal Ownership	31
Economics of the Manufactured Gas Industry	33
Capitalization of a Gasworks.....	33
Fighting Electricity	34
Streetlights	35
Gaslights	35
Residential Hot Water and Cooking	37
Fighting Natural Gas	39
Embracing Natural Gas: A Time of Confusion and Its Environmental Legacy	41
The New Scenario (1928–1960)	41
Confusion Associated with the New Scenario	44
Environmental Downside of the Substitute Natural Gas (SNG) Scenario	44
Holding Companies.....	44
Factors Leading to Formation of Holding Companies.....	45
Utility Management Service Costs.....	45
Holding Company Failures and the Great Depression.....	45
Today's Implications of MGP Ownership by Holding Companies	46
Early Federal Anti-Trust Actions against Utility Holding Companies	46
The Large Utilities.....	47
Case Example of the Philadelphia Electric Company	48

Casualties of War	48
Gasworks in Our Time	48
Films with Gasworks' Background	48
Summary	53
Chapter 2 Gas Manufacturing Processes (I): Coal Gas and Carburetted	
Water Gas (Lowe).....	55
Introduction	55
Modern Environmental Implications of Historic Gas Feedstocks.....	56
Coals.....	57
Peat	58
Lignite and Brown Coal (<i>Lignite</i> [France], <i>Braunkohle</i> [Germany]).....	58
Traditional Alternative Fuels for Manufactured Gas	63
Resin (Rosin) and Fatwood.....	63
Wood.....	63
Kerosene	64
Naphtha.....	64
Benzole	65
Coke.....	66
Nontraditional Fuels for Manufacture of Illuminating Gas	66
Influences of Price Fluctuations on Gas-Making Feedstocks	67
Development of Gas-Manufacturing Processes	67
Historic Attempts to Manufacture Gas from Coal-Gas Tar.....	68
The Broad Selection of Gas-Manufacturing Processes and Variants	77
Coal Gas (Dry Distillation of Coal).....	87
Selection of Gas Coals.....	88
Situation about 1850	91
Situation about 1885	91
Situation about 1900.....	92
Situation about 1920.....	98
Situation about 1940.....	100
Coal Gas	105
Retorts (Ovens).....	105
Retort Capacity.....	109
Retort House (Gashouse).....	109
Furnaces and Boilers	113
Modifications to Retort Houses.....	113
Ascension Pipes, Dips, and the Hydraulic Main.....	113
Linking the Retorts to the Gas Treatment Process and to Generation	
of Toxics	114
Tar Wells and Clarification Sumps.....	117
Alternative Forms of (Improved) Coal-Gas Retorts	117
Through Retorts at Coal-Gas Plants.....	117
Processes Employing Gravity as an Assist.....	117
Inclined Coal-Gas Retorts.....	118
Vertical Coal-Gas Retorts	119
Intermittent and Continuous Vertical Coal-Gas Retorts.....	119
Coal-Gas Enrichment.....	122
Water Gas (Blue Gas=Blue Water Gas=Blast Furnace Gas=Producer Gas).....	123

Dealing with the Term “Water Gas”	123
Differentiation of Water Gas from Oil-Enriched Water Gas	123
Carburetted Water Gas (CWG)	124
The Coming of Carburetted Water Gas (Lowe; CWG).....	124
Empirical Generalizations Regarding CWG Systems.....	126
Institutional Resistance to Adoption of CWG for Illumination	126
The Economic “Beauty” of Carburetted Water Gas (CWG).....	129
Understanding the Workings of Carburetted Water-Gas (CWG) Generation	132
Carburetted Water-Gas (CWG) Sets.....	132
Generators	135
Carburetors	135
Superheaters	136
Function of the Carburetted Water-Gas (CWG) Seal.....	137
The Relief Holder	140
PG&E’s Resurgent Experiment with Carburetted Water Gas (1925).....	144
Influences of Price Fluctuations on Gas-Making Feedstocks	144
Narrative (1918) of the New Municipal Coal-Gas Plant at Bellefontaine, OH.....	147
Summary	149

Chapter 3 Gas Manufacturing (II) Secondary Processes: Gas-Manufacturing

Processes Other than Coal Gas and Carburetted Water Gas	151
Premise of the “Second” and “Third” Levels of Gas-Related Processes	151
General Phasing of Second and Third Levels of Gas-Manufacturing Processes	151
Subtle Exceptions to Hatheway’s Concept of Gas-Process Phasing	151
Second-Level Gas-Manufacturing Processes.....	157
Oil-Enriched Water Gas: Lowe’s Competitors and Emulators	157
Remedial Implications.....	166
Water Gas (Blue Gas = Blue Water Gas = Blast Furnace Gas = Producer Gas).....	166
Blue Gas (Water Gas)	167
Gas Engines, Producer Gas, and Producer Gas Engines	167
Producer Gas Engines	167
Early Gas Engines	167
Industrial Sites Favoring the Use of Gas Producers.....	169
Producer (Fuel) Gas and Its Production and Use	174
Producer Gas Engines	174
Producer Gas as an Industrial Fuel	180
Producer Gas Plants as Industrial Fuel Gasworks.....	182
Gas Producer Processes	182
Pressure Producers	187
Suction Producers.....	188
Combinations of Pressure and Suction.....	192
Where to Expect to Encounter Gas Producers	193
Producer Gas Residuals and Wastes.....	199
Fate of Producer-Plant PAH and Gas-Treatment Wastes.....	200
Remedial Implications for Producer Gas Plants (Gas Producers).....	201
Pacific Coast Oil-Gas	202
Remedial Implications Associated with Pacific Coast Oil Gas Plants.....	203
Coal Carbonization	203

By-Product Coke-Oven Plants	203
Remedial Aspects of By-Product Coke-Oven Plants	208
Other Carbonization Processes of Coal and Organic Feedstocks	213
Summary	213
Chapter 4 Third-Level Gas-Related Processes	231
Premise of the “Third-Level” Processes of Gas Manufacturing	231
Artificial Gas: Manufacturing Processes Producing Lesser Accumulations of Toxic Residuals and Wastes	231
Various Patented Gas-Manufacturing Processes	231
Early Oil-Gas Systems (Pre-1890)	238
Early Oil-Gas Processes	241
Remedial Implications of Early Oil-Gas Plants	242
Substitute Natural Gas (SNG: 1920–1955).....	242
Historic Perspective: The Role of Edward G. Boyer, Gas Engineer	243
SNG Processes as Sources of Toxic Residuals and Wastes.....	243
Contemporary (2010) Concern for Contamination at Derelict SNG Plant Sites	248
Contemporary Case-in-Point: Riverhead, Long Island.....	251
Remedial Implications for Derelict SNG Sites.....	251
Gas–Air Mixtures	253
Butane–Air (Compressed Gas Service) Gas Plants.....	253
Propane Plants	254
Remedial Implications.....	254
Railway Lighting	255
Pintsch Oil-Gas Process	255
Typical Pintsch Plant as a Remediation Target	263
On-Board Rail-Car Pintsch Lighting Equipment.....	263
Numbers of Pintsch Railway Oil-Gas Plants	263
Remedial Implications for Pintsch Railway Gas Plants	267
Late Twentieth Century High-Technologies for Coal Gasification (aka <i>Syntheses</i> Plants).....	268
Other Carbonization Processes of Coal and Organic Feedstocks	269
Nonrecovery Coke and Charcoal Ovens (Carbonization).....	273
Synopsis of the Duration and Impact of Beehive Coke Ovens	273
“Standard” American Beehive Non-recovery Block Coke Oven.....	274
“Belgian” Beehive Non-recovery Block Coke Oven	275
Planning and Conducting Beehive Oven Site and Waste Characterization	277
Using Historic Industrial Archeological Artifacts in Beehive Site Assessment.....	281
Summary of Remedial Implications for Beehive Coke-Oven Plants.....	281
Artificial Gas: Manufacturing and Related Processes Not Known for Producing Accumulations of Toxic Residuals and Wastes	285
Institutional Gas Machines.....	286
Illuminating Gas from “Gasolene” and Acetylene	291
“Gasolene” (Spirit or Vapor) Gases.....	292
The Coming of Burning Fluid.....	292
Gasolene Vapor Gas	292
Gasolene Gas Machines	293
Westinghouse Compressed Gasoline Vapor Lighting	295

The American Gas Machine Company 296

Remedial Implications of “Gasolene” Gas Plants 296

Acetylene (C₂H₂) Gas 296

 Acetylene Small-Town Systems 297

 Acetylene Plants at American Military Posts and Installations 299

 Acetylene Railway Lighting 299

 Remedial Implications for Acetylene Gas-Lighting Plants 303

Lime-Light 303

 Remedial Implications for Sites of Limelight Usage 303

Bottle-Compressed Liquid Manufactured Gas 304

 Blau Gas 304

 Remedial Implications of Blau Gas-Manufacturing Plants 305

Carbon Briquettes for Home and Fuel 305

 Conversion of Peat to Low-Carbonization Fuel Briquettes 305

 Remedial Implications of Derelict Fuel Briquette Plant Sites 305

Peat-Gas Plants 305

Refrigeration as a Derivative of Manufactured Gas 307

Summary 308

Chapter 5 Gasworks Components (I): Generation through Clarification (or Pre-Purification) 309

Concept of the “Engineered” Gasworks 310

The Clarification Processes 311

Clarification: The Means of Pre-Purification Gas Cleansing 312

Clarification and the Particulate-Removal Train 314

Concept of Removal of Particulate Gas Impurities 317

Concept of Tar Capture 318

 Tar Extractors 319

 Tar Filters 319

 Straw-Box Tar Filter for Discharged Gas Liquor Plant Effluent (1905) 319

 Tar Filter as a Fitting on Large Carburetted Water-Gas Sets (1926) 322

 Tar Separators 322

 Tar Filter Boxes for Final Gas-Liquor Predischarge Treatment 332

 Lampblack Separators 332

Management of Collected Gas Tars and Tar Residuals 334

 Tar Management Options 334

 Discharge of Tar to the Ground 334

Exhausters 340

The Wash Box 342

 Remedial Implications 344

Condensation 344

 Remedial Implications Related to the Presence of Manufactured Gas

 Condenser Locations 350

 Generalizations about Manufactured Gas Condensers 353

 Remedial Implications of Condenser Use 356

Washers 356

Scrubbers 358

 Scrubbers Designed for Particular Removals 359

 Light-Oil Scrubbing 360

 Rotary Scrubbers 360

Tower Scrubbers	360
Remedial Implications of Scrubber Utilization.....	366
Washer-Scrubbers.....	368
Scrubber Doubles as Condenser and Wash Box.....	368
Combined Use of Condensers, Scrubbers, and Washers.....	370
Electrostatic Precipitators	370
Purification and Storage (Chapter 6).....	372
Purifiers	372
Gasholders	373
Summary	373
Chapter 6 Gasworks Components (II): Purification and Storage.....	375
Purification.....	375
Today's Environmental Impacts of Yesteryear's Purification Activities.....	375
Contaminants and Contamination Associated with Purification and Spent Purifier Media.....	377
Gas Impurities Treated by Purification	379
Purification as a Process.....	379
Purifier Design	381
Purifiers as Viewed from the Standpoint of Size and Layout	381
Quantities of Spent Purification Media.....	382
Series Removal of Impurities	382
Sizing of Purifiers.....	382
The Basic Purification Process.....	383
Purifier Trays	387
Purification Media.....	389
Selection of Purification Media Based on Performance and Handling.....	391
Coal-Liming as a Pre-Purification Extender of Media Life.....	392
Lime as a Purifier Medium.....	392
Crushed Sea Shells	395
Crushed Lime	395
Potential Reuse of Spent Purifier Lime	396
Wood Shavings	396
"Oxides"	396
Iron Oxide (Bog Iron Ore).....	397
Iron Strips, Borings, and Filings	397
Proprietary Brands of Prepared Oxide.....	398
Appearance of Spent Iron Oxide in the Gasworks Dump.....	398
A Misnomer.....	399
Preparation of the Shavings/Metallic Particle "Oxide" Mixture	399
Life of Purifier Media.....	400
Spent Purifying Media as a Contaminant	403
Purifiers as a Remediation Consideration	404
Contamination around Purifier Boxes.....	405
Fate of Spent Purification Media.....	405
Removal, Collection, and Management of Gas Impurities	405
Hierarchical Steps in the Generation of Gas Plant Wastes: Toxic and Nontoxic	405
Hierarchy of Process Factors	406
Hierarchy of Products, Residuals, By-Products, and Wastes	407
Cyanide Removal.....	408

Gasholders (Gasometers).....	410
Purpose and Function of Gasholders	412
Gasholder/Gasometer Design.....	412
Evolution of the Gasholder.....	413
Important Design Features (for Remedial Engineering Consideration).....	417
Gasholder Tanks (Pits and Basins).....	425
Pit-Valve Chambers	430
Remedial Implications of Gasholder Design Type.....	430
Gasholder Types	431
Gasholders Classified by Function	432
Commercial Gasworks	432
Relief Holders	432
Storage Holders.....	433
Distribution Holders	433
Off-Plant District (Distribution) Holders.....	433
Institutional.....	433
Small Commercial	434
Railyards.....	434
Gasholders Classified by Design Characteristics	434
Non-Telescoping	435
Multi-Lift Gasholders.....	435
Slab-on-Grade	437
Waterless.....	437
High-Pressure Holders; Spherical, Hemispherical and Cylindrical.....	438
Construction of Gasholders.....	439
Representative Gasholder Water-Seal Tanks.....	456
Maintenance of Gasholders.....	460
Generic Leakage of Gasholder Subsurface Water-Seal Tanks.....	462
Gasholders Employed for Early Bottled Gas Distribution	466
“Sediment” in Gasholder Water-Seal Tanks	470
Gasholder Accidents.....	473
Governors	473
Survival of Holders.....	473
Remedial Implications of Gasholders	476
A Selection of Gasholder Layout Plots.....	480
Distribution of Manufactured Gas	483
Gas Mains and Distribution Systems	484
Gas Plant Distribution System.....	484
Mains and Distribution Pipes	484
Compressors	485
Off-Site Gas Storage.....	485
Meters	485
Summary	487
Chapter 7 Historic Sources, Mechanisms, and Choices Responsible for Coal-Tar Site Contamination.....	489
Organization of This Chapter.....	489
Anticipating Residuals and Wastes at Derelict Gas-Plant Sites	489
Discriminating between Coal-Tar Residuals and Petroleum Hydrocarbons.....	490
Nuisance Odors as an Indication of Pollution Release.....	491

<i>Case of Margaret Bohan (Respondent) vs. the Port Jervis Gaslight Company</i>	493
Physical and Chemical Nature of Gasworks Contaminants	493
Organic Hydrocarbons	494
Petroleum Hydrocarbons	496
Hydrocarbons Found in Diesel Fuels (Oils)	498
Coal-Tar Hydrocarbons	499
Coal-Tar Process Residues as Gas-Manufacturing Contaminants.....	499
Modern Studies of PAH Compounds as Toxic Organic Chemicals.....	501
Impact of the Appendix VIII List of Priority-Pollutant PAHs.....	501
Regulatory Use of the Appendix VIII List of Priority Pollutant PAHs Is Scientifically Flawed	505
Dealing with the Flaw Produced by RCRA Appendix VIII	505
Nongasification Types of PAHs.....	506
Arguments Featuring Anthropogenic (Non-FMGP) PAHs	506
Potential Confusion over Obsolete PAH Chemical Compound Names	507
Coal Distillation versus Coal Carbonization.....	507
Temperature Effects of Carbonization on Nature of Residuals	510
Particular Coal-Tar Residuals as Gasworks Contaminants.....	511
The Light Oils of Coal Tar as Residuals of Gas Manufacturing.....	511
Naphthalene as a Manufactured Gas Residual	511
Light Oils: Monocyclic Aromatic Hydrocarbons—BTEX	520
Light Oils: Duocyclic Aromatic Hydrocarbons	521
Naphthalene	521
Capture of Naphthalene at the Drips	528
Removal of Naphthalene in the Clarification Train.....	528
Naphtha or the Naphtha Cut (a Solvent)	529
Toluol	531
Middle Oils of Coal Tars; the Phenols, Cresols, and Carbolic Oils.....	534
Tar Acids: Phenols and Cresols	534
Tar Oils: “Coal Tar” as The Typical Manufactured Gas PAH Mixture.....	535
Tars	535
Heavy Oils: High-Ring PAHs (More Viscous Tars and Creosote Oils).....	537
Green Oil (Anthracene Oils).....	537
Residuals Produced by Carbonization of Lignite.....	537
Residuals Typical of the Various Manufactured Gas Processes	537
Residuals Typical of Coal Gas Production.....	537
Gas Liquors.....	540
Tars of Carburetted Water Gas.....	545
Naphthalene-Residual Tar	546
Carburetted Water Gas Oils.....	546
Crude-Oil Tars of Carburetted Water Gas Generation.....	546
Residuals Typical of Oil-Gas Production	546
Residuals Typical of Producer-Gas Processes.....	548
Historic Gasworks Management Options for Gas-Manufacturing Residuals.....	549
Gas-Yard Accumulation of Tar Residuals	551
Collection and Direct Discharge	551
Management of Tar Residuals	552
Residuals Separation and Storage	552
Historic Commentary Regarding Gas-Plant Residuals Management	553
Coal Tar as a Gasworks Furnace and Steam Boiler Fuel	555

Burning for Disposal of Unwanted Tars.....	557
As Internal Combustion Engine Fuel	558
Collection, Storage, and Sales	558
Direct Sales.....	558
Rail Shipment	558
Briquettes.....	558
Gasworks Process Components as Sources of Site Contamination	559
Gas Holders	559
Tar Extractors	559
Wash Boxes.....	560
All Other Clarification Devices, along with Purifiers.....	561
Gasworks Fluid and Semifluid Residuals and Wastes as Potential Contaminants ..	561
Clarification Effluent Waters	561
Tars and Tar Sludge.....	563
Management of Gasworks Tars.....	563
Tar-Separation Sludge	563
Ammonia	565
Light-Oil Still Wastes	566
Producer Gas-Tar Extraction	566
Gas “Cooler” Water.....	566
Tar–Water Emulsion, the Troubling Residual-Turned Toxic Waste	566
Treating Tar–Water Emulsions	569
Modern Remedial Implications of Tar–Water Emulsions.....	570
Oil-Gas Plant Tars	575
Coke-Oven Plant Tars.....	576
Gasworks Solid Wastes as Potential Contaminants	576
General Remedial Implications of Gas-Manufacturing Solid Residuals and Wastes.....	577
Coke.....	577
Ash.....	578
Clinker	580
Spent Purifier Media (Purifier Box Waste).....	581
Spent Purifier Lime	581
Spent Wood Chips and Shavings.....	582
Spent Iron Oxides and Oxide Mixtures.....	583
Cyanide and Cyanogens	584
Prussian Blue-Stained Gravel and Cobbles	587
Ferrocyanides.....	587
Historic Cyanogen Recovery	588
Regulatory Implications of Gasworks Cyanide and Cyanogens	588
Tar Pitches	589
Lampblack	590
Trapping Lampblack in Oil Gas Wash-Box Residuals.....	590
Breeze	592
Inert Solid Wastes at Gasworks Sites	592
Demolition Waste of Replaced Ceramic Retorts and Brick Benches.....	593
Inert Plant Trash	594
Historic Reuse Options for Gasworks Residuals.....	595
On-Plant Use of Gas Tar as Gas-Plant Fuels.....	595
Burning Tar at the Gasworks, as a Fuel	597
Gas-Plant Accommodations for Off-Plant Sales of Gas Tars	600

Gasworks Dumps and Tar Ponds	600
Detecting and Verifying Gasworks Dumps	608
The Reality of Gasworks Dumps	609
Case Study of Gasworks Nos. 1 and 2, Ramsgate, Kent, the United Kingdom	610
Gasworks Dumping on or into Bodies of Open Water.....	612
Plant-Area Contaminated Sediment.....	613
Tar Ponds as an Historic Residuals Management Option	614
Tar Ponds as the Ultimate Disposal Site for Tar–Water Emulsions	615
Case of the Adamczak Road Gasworks Dump, Manistee, MI.....	615
Fate and Transport of Coal-Tar Residuals	615
Source Areas and Associated Waste Types for Characterization Planning	617
Waste Types	617
Fate of Residuals and Wastes at the Plant Site	617
Fate of Surface Disposal.....	617
Evaporation	617
Weathering and Degradation	617
Organic Chemical Fingerprint Association with Source Area	617
Historic Knowledge, Legislation, and Litigation over Gas-House Wastes	618
By-Product Recovery Operations as Sources of Gasworks Contamination	618
Recovery of By-Products.....	619
Recovery of Naphthalene as a By-Product Base	619
Inorganic Compounds	621
Sulfur	621
Ammonia and Its Recovery	622
Ammonia Still Wastes	623
Recovery of Ammonium Sulfate.....	624
Historic Case of Ammonia Scrubber Waste Pollution at Schenectady, NY.....	624
Modern Remedial Implications of Gas-Plant Ammonia.....	627
Solid Wastes That May Mimic Tar Residuals	628
Heavy Metals	628
Predictable Gas-Yard Sources of Site Contamination.....	628
Management of Condensation and Purification Residuals.....	628
Condensers and Other Fine-Particle Removers.....	629
Coal Gasification Condenser Residuals.....	629
Tar Extractors and Separators	629
Tar Extractors	630
Relief Holders as a Crude Form of Tar Separators	631
Water Gas-Tar Separators and Their Overflow	633
Overflow from Washers and Washer Scrubbers.....	633
Tar Wells.....	634
Curious Case of the “Migrating” Tar Well, Springfield, MO	636
The Function of Tar Wells.....	638
Tar Wells as Discharge Points for Residuals	640
Tar Tanks (Surface and Subsurface).....	640
Water-Gas Wash-Box and Carburetted Water-Gas Wash-Box Residuals	640
Purifiers	641
Leaks, Spills, Drainages, and Direct Discharges as Sources of Site Contamination.....	642

Drainage of Tar Residuals and Tar Wastes.....	642
Case of Lake Station, a Central Station (aka “Gasworks Park”), Seattle, WA (1906–1965).....	643
Gasworks Piping Leaks.....	643
Fluid Leakage from Subsurface Vessels	643
Corrosion-Based Leakage	644
Chemical Corrosion and Pipe Leaks	646
Corrosion of Aboveground Plate Steel Gasholder Water-Seal Tanks	646
Electrolytic Corrosion from Stray Trolley-Line Currents	647
Off-Site Subsurface Leaks.....	648
Various Coal-Tar Operations as Sources of Contamination	651
Recovery of Coke-Oven By-Products	651
Collection of Coke-Oven Gas.....	651
Primary Cooler.....	651
By-Products Building	651
Final Cooler and Benzol Washer.....	651
Variations in Coke-Oven Design.....	651
Remediation Implications of By-Product Coke-Oven Sites	652
World War I and the U.S. Government Toluol Plants.....	652
Coal-Tar-Consuming By-Product Industries	659
Coal-Tar Distilleries	659
Nature of the Tar By-Product Distillation Industry.....	661
Coal-Tar Paints and Pipe Dips.....	662
Coal-Tar Pitch.....	662
Coal Tar as Solvent and Fabric Waterproofing.....	664
Coal Tar as a Marine Preservative	664
Coal-Tar Residuals as a Fungicide/Pesticide Base	664
Charcoal Kilns and Wood-Distillation Plants.....	665
Charcoal Kiln Sites.....	665
Wood Distillation Sites.....	665
World War I and the U.S. Government Cellulose Acetate Plants	666
Wood-Tar By-Products	667
Remedial Implications of Wood-Tar Sites.....	667
Incandescent Mantle Manufacturing Residue (Thorium).....	667
The Fine-Chemical Tar Industry Plants	668
Coal Tar as a Source of Color Dyestuffs.....	668
Dye Industry	669
Medicinal Tar Compounds.....	669
Coal-Tar Distilleries as Uncontrolled Hazardous Waste Sites	670
Wood Preservation Facilities as Uncontrolled Hazardous Waste Sites.....	670
Early American Wood Preservation Techniques by Creosote	670
Tar in Wood Preservation	671
Creosote.....	672
Remedial Implications of Creosote-Based Wood-Treatment Plant Sites	680
Coal Tar as a Road Improvement Product.....	680
Gas Tars in Road Construction.....	680
Historic Road-Tar Developments in Europe.....	683
Historic Road-Tar Developments in America	685
Technical Developmental Aspects of Road-Tar Usage.....	685
Road Paving and Surface Treatment by Prepared Coal Tar.....	687

The Coal-Tar Specialty Industry Producing Road Tars	687
Application of Prepared Coal-Tar Road Improvement Products.....	689
The Final Outcome: Asphalt vs. Road Tar	689
Historic Operational Nuisances and Damages Associated with Manufactured Gas Plants.....	689
State of Knowledge Regarding Gas-Manufacturing Residuals during the Gas-Production Era	691
Summary	691
Chapter 8 Historic Technical Literature of Manufactured Gas	695
Introduction	695
Dealing with the Literature	695
Types of Literature Pertaining to Remediation of FMGP Sites	696
What the Literature Reveals of Importance to Remediation	697
Nature and Dissemination of Remediation-Relevant Gas Industry Literature ...	698
Levels of the Technical Literature.....	698
“Authority” of Literature	698
“Absolutes” about the Literature	704
Technical Journals.....	709
Applicable Journals to 1960	709
Effect of Emerging Natural Gas Activity.....	709
Effect of Post-1930 Shortages in Gas-Manufacturing Feedstocks.....	709
Making Practical Remedial Use of the Literature	710
Selected Useful Technical Papers.....	710
Handbooks and Textbooks	710
Journals of the Manufactured Gas Industry	714
Historic Literature in Microform and Internet Digital Archival Format	714
Making Use of the <i>American Gas-Light Journal</i>	715
Related Sanitary Engineering Content of American Journal Papers	715
Applicable Governmental Agency Literature	715
Other Major Types of Relevant Technical Literature.....	716
Historic Congresses and Expositions	716
Regional and National Gas Association Proceedings	716
Federal and State Engineering Experiment Stations.....	718
Regional Engineering Associations	723
Technical Journals of Allied Industrial Fields	723
Commercial Journals of Engineering and Applied Science.....	730
Standard Indices to Engineering and Science Literature	730
Early Directories of Gas Companies	730
Brown’s Directory of North American Gas Companies.....	731
Gas Record “Pink Directory”.....	735
Gas Utility Company Archives	736
Internal Literature and Documents	736
Gas Utility Periodic Operational Reports	736
Gas Utility Annual Reports and Employee/Public Relations Magazines.....	736
Gas Utility Operational Documents.....	738
Annual Reports of Corporate Internal Departments.....	741
Annual Reports to Stockholders and to U.S. Government.....	743
General Manager Annual Reports.....	743
Plant Financial Records of Income and Expenditures	743

Maps of Generation and Distribution Systems.....	743
Maps of Real Property at Individual Stations	743
Contour Maps and Boring Logs for Proposed Station Development	744
Layout Maps of Individual Gas Plants and District Stations	744
Contract Specifications and Drawings for Plant Components	745
Charts of Corporate History	750
Charts of Corporate Organizational Management	750
Charts of Corporate Executive Responsibility	750
Charts of Properties Owned and Controlled	752
Biographic Details of Key Personnel	752
Corporate Photographic Archives	752
Stock Certificate Art of Manufactured Gas	752
Environmental-Era Corporate Historical Assessments.....	756
In-House Conclaves.....	756
Utility Industry Public Information.....	756
Role of Universities in Gas Industry Education and Technology Exchange	756
Public Utility Regulatory Agencies.....	756
State Public Utility Regulatory Commissions (PUCs).....	759
Other State Regulatory Agencies	765
City Ordinances (American Franchising)	766
Congressional Anti-Trust Hearings and Reports.....	766
Historical Summaries to the Federal Power Commission	767

Summary	794

PART II The Remediation Process

Chapter 9 Site and Waste Characterization for Coal-Tar Contamination	797
Expecting and Predicting the Presence of Former Gas Plants	798
Status of American State Agency FMGP Remediation Activities	801
History of American Activities in Locating and Remediating FMGPs	801
Legal Bases under Which Gasworks Are Remediated	801
Historic Emphases on Gasworks Remediation	801
Basis for USEPA Concern for Former Gasworks and Related Coal-Tar Sites	802
A Word about “Coal-Tar” Sites, as Related to the RCRA Appendix	
VIII PAHs	802
Historic Flaws in CERCLIS Screening	802
Research Access to CERCLIS FMGP Sites	803
Identification of FMGP Sites via Internet	803
Gaining Access to FMGP Site Environmental Records	803
Proper Importance of NFRAP	803
Original USEPA Rationale for NFRAP’ing	804
Fate of NFRAP’d FMGPs	804
Other Forms of Terminating Remedial Action	805
Public Utilities as Responsible Parties	807
Risk Assessment as Applied to FMGPs	808
Coal-Tar Impacts on State Transportation Departments	808
State DOT Experience	808
What the Transportation Advisory Agencies Have to Say	809
Example Circumstances under Which Certain FMGPs Were First	
Discovered	809
Importance of Accurate Site and Waste Characterization	809
Chronologic Assessment of Coal-Tar Operations	809
Guide to Competent Historic Assessment	812
Areas for Document Discovery	814
Publications, Formal and Informal	815
Analyzing Site Operational Chronology	815
Framework	815
Factoring in the Utility Holding Companies	815

Planning and Conduct of Site and Waste Characterization	816
Analysis	819
Evaluation	819
Chemical Characterization of Historic Gas-Manufacturing Wastes	823
Let the Coal Tar Speak for Itself	823
Dealing with the EPA RCRA Appendix VIII Coal-Tar PAHs.....	827
Conditions of Expected Coal-Tar Loss.....	827
Conditions of Expected Coal-Tar Recovery	827
Source Areas	828
Disposal	828
Gasholders as Sources of Residuals	830
A Rationale for Analyzing Gasholder Locations	831
Fate of Gasworks Residuals and Wastes	832
Fate of Surface Disposal.....	833
Evaporation.....	833
Weathering and Degradation.....	834
Migrated Contamination	834
Detection of Coal-Tar Residuals.....	834
Phenols as Indicators	834
Pyrene as an Indicator	835
Guidelines for Prediction of DNAPL Movement	836
Seven Intrinsic Geologic Parameters Controlling Migration.....	837
Porosity	839
Permeability (to Coal-Tar Residuals).....	839
Tortuosity (of Flow Channels)	839
Saturation Percent.....	839
Heterogeneity (of Sedimentary Character).....	839
Entry Pressure (of Infiltrating Groundwater).....	839
Capillary Pressure (of Opposing Capillary Fringe).....	840
Sum Total of PAH Migration Forces	840
Gross Estimation of Source-Volume Extent.....	840
Utilization of Geologic Factor Assessment	843
Coal-Tar Residuals in Groundwater	843
Historic Events as Disruptors of Gasworks.....	843
Erroneous Dismissal of PAHs at Undetected Coal-Tar Sites.....	843
Livingston, Montana Rail Yards	843
Case of the Former Atlas Powder Works, near Joplin, MO	845
Geologic Complexities in MGP Site Characterization.....	847
Standard of Care in Site Characterization	848
Respecting and Utilizing Site Technical History	848
Essential Format for the Site Characterization Report	851
Essential Focuses of a Comprehensive Site and Waste Characterization	853
Regulatory Consent Orders and Decrees	854
Remediation Planning and Selection of Consultant.....	854
Evaluation of Consultants.....	855
All Consultants Are Not in Fact Equal	857
Priced-Competition Is a Method of Consultant Selection.....	857
Breadth of Experience	857
Local vs. National Experience.....	858
FMGP Consultant Selection Process.....	858

Budgeting.....	858
Contracting	859
Managing the Consultant	859
Integration of Legal Counsel.....	859
Work Plans.....	859
Gasworks Contamination	860
Gas Plant Source Areas.....	861
Gasyard Corrosion as a Source of Leaked Residuals.....	861
Waste Disposal Bodies (Dumps).....	863
The Gasworks Dump.....	863
Box Wastes, in General	865
Migrated Wastes.....	867
Iteration of Incoming Field Data	867
Use of Laboratory Testing.....	867
“Fingerprinting” of Tar Affinity and Likely Origin.....	868
Risk Assessment.....	870
Usual Purpose for Making Risk Assessments of FMGPs.....	870
ATSDR Participation.....	871
Assessment by Responsible Parties	871
Potential Errors in Risk Assessment	871
Errors and Contentious Issues in FMGP Characterization	872
Site Conceptual Geologic Model.....	872
Errors and Erroneous Concepts.....	873
Erroneous Concepts.....	873
Contentious Issues	873
Need to Employ Multiple Working Hypotheses.....	875
Assumptions	875
Issues of Waste Presence	875
Issues of Fate and Transport.....	876
Chemically Based Excuses for No-Action	876
Issues of Misidentification.....	876
Shortfalls in Scope of Work for Remedial Investigations	877
Legitimate Questions.....	877
Gray Issues, Ghosts, Hearsays, and Fables.....	878
Summary	879
Chapter 10 Selection and Construction of Remedy: A Commendation to the “RPM”	881
Introduction	881
Practical Effects of the Voluntary Cleanup Program Movement in America.....	881
Practical Technological Imperatives of Coal-Tar Site Remediation	883
Basic Coal-Tar Site Remediation Steps.....	886
Documentary History of American Coal-Tar Cleanup	887
Programmatic FMGP Cleanup in the United States	887
Historic Role of the U.S. Environmental Protection Agency in FMGP Cleanup	887
Toxic Gas-Manufacturing Residual and Compounds as a Base Reference in Remedy Selection.....	894
Conventions for Notation of PAH Contaminant Concentration	894
Coal-Tar Compounds Viewed from the Standpoint of Public Health	894
Dealing with Cyanogens	899

Reference Information on Popularity of Particular FMGP Remediation Technologies..... 899

- Typical Remediation Alternatives for Consideration at FMGPs..... 899
- U.S. EPA Records of Decision for FMGPs 899

Selection of Remedy..... 922

- Establishing the Site-Knowledge Basis for Selection of Remedy 922
- Broad Influences on Selection of Remedy..... 922
- Actual Process of Coal-Tar Cleanup in North America..... 923
- Examples of Actual North American Cleanup Actions 923
- Post-Remediation Land Use of Central Station FMGP Sites 923
- Special Attention to Historic Structures Located over Gasworks Toxics 924

Remedial Technologies Particularly Applicable to FMGP Sites 926

Regulatory Classification of Coal-Tar Wastes..... 927

Types of Gasworks Contaminants Subject to Remedial Action 927

- Tars in and about the Gasworks 928
- Dealing with the Multitude of PAH Tar Compounds..... 928
 - Basic Questions to Be Answered for Identified Box Waste Disposal Locations 929
 - Observations Related to Gasworks Cyanogens 930

Potential Risks Associated with Coal-Tar Residuals 931

Selection of Action Levels..... 931

Developing Remedial Objectives 935

- Presumptive Remedies 935
- Air Emissions 935
- Sediment..... 937
- Sheen 938
- Surface Water 939
- Groundwater 939
- By Receptor 939

Compounds of Concern..... 939
