Contents

Foreword	xiii
Acknowledgments.....	xv
Author	xvii
Introduction.....	xix
Chapter 1 History of Manufactured Gas and Coal-Tar Activities	1
Today's Environmental Concern	1
Estimated Number of Former Gas-Manufacturing and Related Sites in the United States and the British Isles	2
Frequency of Discovery Today.....	8
Present-Day Environmental Concerns	10
Origin of Manufactured Gas	12
Gas Plant Architecture and Layout	15
Locating Former Manufactured Gas Plants	18
Franchises and Other Public Certifications of the Manufactured Gas Industry	21
Gas Company Rates to Consumers	22
Competition and Consolidation.....	23
Varieties of Gas Companies and Gas Company Names	24
Municipal Ownership	29
Economics of the Manufactured Gas Industry	31
Capitalization of a Gasworks.....	31
Fighting Electricity.....	32
Streetlights	33
Gaslights	33
Residential Hot Water and Cooking	35
Fighting Natural Gas	37
Embracing Natural Gas: A Time of Confusion and Its Environmental Legacy	39
The New Scenario (1928–1960)	39
Confusion Associated with the New Scenario	42
Environmental Downside of the Substitute Natural Gas Scenario	42
Holding Companies.....	42
Factors Leading to Formation of Holding Companies.....	43
Utility Management Service Costs.....	43
Holding Company Failures and the Great Depression.....	43
Today's Implications of MGP Ownership by Holding Companies	44
Early Federal Anti-Trust Actions against Utility Holding Companies	44
The Large Utilities.....	45
Case Example of the Philadelphia Electric Company	46
Casualties of War	46
Gasworks in Our Time	46
Films with Gasworks' Background	46
Summary	51

Chapter 2 Gas Manufacturing Processes (I): Coal Gas and Carbureted Water Gas (Lowe)	53
Introduction	53
Modern Environmental Implications of Historic Gas Feedstocks.....	54
Coals	55
Peat	56
Lignite and Brown Coal (<i>Lignite</i> [France], <i>Braunkohle</i> [Germany]).....	56
Traditional Alternative Fuels for Manufactured Gas	61
Resin (Rosin) and Fatwood.....	61
Wood.....	61
Kerosene	62
Naphtha.....	62
Benzole	63
Coke.....	64
Nontraditional Fuels for Manufacture of Illuminating Gas	64
Influences of Price Fluctuations on Gas-Making Feedstocks.....	65
Development of Gas-Manufacturing Processes	65
Historic Attempts to Manufacture Gas from Coal-Gas Tar.....	66
The Broad Selection of Gas-Manufacturing Processes and Variants	75
Coal Gas (Dry Distillation of Coal).....	85
Selection of Gas Coals.....	86
Situation about 1850	89
Situation about 1885	89
Situation about 1900.....	90
Situation about 1920.....	96
Situation about 1940.....	99
Coal Gas	103
Retorts (Ovens).....	103
Retort Capacity.....	105
Retort House (Gashouse).....	106
Furnaces and Boilers	108
Modifications to Retort Houses.....	108
Ascension Pipes, Dips, and the Hydraulic Main.....	109
Linking the Retorts to the Gas Treatment Process and to Generation of Toxics	110
Tar Wells and Clarification Sumps.....	113
Alternative Forms of (Improved) Coal-Gas Retorts	113
Through Retorts at Coal-Gas Plants.....	113
Processes Employing Gravity as an Assist.....	114
Inclined Coal-Gas Retorts.....	114
Vertical Coal-Gas Retorts	114
Intermittent and Continuous Vertical Coal-Gas Retorts.....	115
Coal-Gas Enrichment.....	119
Water Gas (Blue Gas = Blue Water Gas = Blast Furnace Gas = Producer Gas).....	119
Dealing with the Term “Water Gas”	119
Differentiation of Water Gas and Oil-Enriched Water Gas	120
Carbureted Water Gas	120
The Coming of Carbureted Water Gas (Lowe; CWG).....	121
Empirical Generalizations Regarding CWG Systems.....	122

Institutional Resistance to Adoption of CWG for Illumination 125
 The Economic “Beauty” of Carbureted Water Gas 126
 Understanding the Workings of Carbureted Water-Gas Generation..... 130
 Carbureted Water-Gas Sets 130
 Generators 132
 Carburetors 132
 Superheaters 133
 Function of the Carbureted Water-Gas Seal 135
 The Relief Holder 140
 PG&E’s Resurgent Experiment with Carbureted Water Gas (1925)..... 144
 Influences of Price Fluctuations on Gas-Making Feedstocks 145
 Narrative (1918) of the New Municipal Coal-Gas Plant at Bellefontaine, OH 145
 Summary 148

Chapter 3 Gas Manufacturing (II) Secondary Processes: Gas-Manufacturing

Processes Other Than Coal Gas and Carbureted Water Gas 149
 Premise of the “Second” and “Third” Levels of Gas-Related Processes 149
 General Phasing of Second and Third Levels of Gas-Manufacturing
 Processes 149
 Subtle Exceptions to Hatheway’s Concept of Gas-Process Phasing 149
 Second-Level Gas-Manufacturing Processes..... 154
 Oil-Enriched Water Gas—Lowe’s Competitors and Emulators 155
 Remedial Implications..... 164
 Water Gas (Blue Gas = Blue Water Gas = Blast Furnace Gas = Producer Gas)..... 164
 Blue Gas (Water Gas) 165
 Gas Engines, Producer Gas, and Producer Gas Engines 165
 Producer Gas Engines 165
 Early Gas Engines 165
 Industrial Sites Favoring the Use of Producer Gas Engines 167
 Producer (Fuel) Gas and Its Production and Use 172
 Producer Gas Engines 172
 Producer Gas as an Industrial Fuel 178
 Producer Gas Plants as Industrial Fuel Gasworks..... 179
 Gas Producer Processes 180
 Pressure Producers 186
 Suction Producers 186
 Combinations of Pressure and Suction..... 190
 Where to Expect to Encounter Gas Producers 191
 Remedial Implications for Producer Gas Plants (Gas Producers)..... 197
 Producer Gas Residuals and Wastes..... 198
 Fate of Producer-Plant PAH and Gas-Treatment Wastes..... 199
 Pacific Coastal Oil-Gas 200
 Remedial Implications Associated with Pacific Coast Oil Gas Plants..... 201
 Coal Carbonization 201
 By-Product Coke-Oven Plants 201
 Remedial Aspects of By-Product Coke-Oven Plants 206
 Other Carbonization Processes of Coal and Organic Feedstocks 211
 Summary 211

Chapter 4	Third-Level Gas-Related Processes	229
	Premise of the “Third-Level” Processes of Gas Manufacturing	229
	Artificial Gas—Manufacturing Processes Producing Lesser Accumulations of Toxic Residuals and Wastes	229
	Various Patented Gas-Manufacturing Processes	229
	Early Oil Gas Systems (Pre-1890).....	236
	Early Oil-Gas Processes	239
	Remedial Implications of Early Oil-Gas Plants	240
	Substitute Natural Gas (1920–1955).....	240
	Historic Perspective: The Role of Edward G. Boyer, Gas Engineer	241
	SNG Processes as Sources of Toxic Residuals and Wastes.....	241
	Contemporary (2010) Concern for Contamination at Derelict SNG Plant Sites	246
	Contemporary Case-in-Point: Riverhead, Long Island	249
	Remedial Implications for Derelict SNG Sites.....	249
	Gas–Air Mixtures	251
	Butane–Air (Compressed Gas Service) Gas Plants.....	251
	Propane Plants	252
	Remedial Implications.....	252
	Railway Lighting	253
	Pintsch Oil-Gas Process	253
	Typical Pintsch Plant as a Remediation Target	261
	On-Board Rail-Car Pintsch Lighting Equipment.....	261
	Numbers of Pintsch Railway Oil-Gas Plants	261
	Remedial Implications for Pintsch Railway Gas Plants	265
	Late Twentieth Century High-Technologies for Coal Gasification (aka <i>Syntheses</i> Plants)	266
	Other Carbonization Processes of Coal and Organic Feedstocks	267
	Nonrecovery Coke and Charcoal Ovens (Carbonization).....	271
	Synopsis of the Duration and Impact of Beehive Coke Ovens	271
	“Standard” American Beehive Nonrecovery Block Coke Oven.....	272
	“Belgian” Beehive Nonrecovery Block Coke Oven	273
	Planning and Conducting Beehive Oven Site and Waste Characterization	275
	Using Historic Industrial Archeological Artifacts in Beehive Site Assessment	279
	Summary of Remedial Implications for Beehive Coke-Oven Plants.....	279
	Artificial Gas—Manufacturing and Related Processes Not Known for Producing Accumulations of Toxic Residuals and Wastes	284
	Institutional Gas Machines.....	285
	Illuminating Gas from “Gasoline” and Acetylene.....	289
	“Gasoline” (Spirit or Vapor) Gases	289
	The Coming of <i>Burning Fluid</i>	289
	Gas Machines	290
	Gasoline Vapor Gas.....	291
	Westinghouse Compressed Gasoline Vapor Lighting	292
	The American Gas Machine Company	294
	Remedial Implications of “Gasoline” Gas Plants	294
	Acetylene (C ₂ H ₂) Gas	294
	Acetylene Small-Town Systems	295
	Acetylene Plants at American Military Posts and Installations.....	297

Acetylene Railway Lighting 297
 Remedial Implications for Acetylene Gas-Lighting Plants 301
 Lime-Light 301
 Remedial Implications for Sites of Limelight Usage 301
 Bottle-Compressed Liquid Manufactured Gas 302
 Blau Gas 302
 Remedial Implications of Blau Gas-Manufacturing Plants 303
 Carbon Briquettes as Home and Fuel 303
 Conversion of Peat to Low-Carbonization Fuel Briquettes 303
 Remedial Implications of Derelict Fuel Briquette Plant Sites 303
 Peat-Gas Plants 303
 Refrigeration as a Derivative of Manufactured Gas 304
 Summary 306

Chapter 5 Gasworks Components (I): Generation through Clarification

(or Pre-Purification) 307
 Concept of the “Engineered” Gasworks 308
 The Clarification Processes 309
 Clarification: The Means of Pre-Purification Gas Cleansing 310
 Clarification and the Particulate-Removal Train 312
 Concept of Removal of Particulate Gas Impurities 315
 Concept of Tar Capture 316
 Tar Extractors 317
 Tar Filters 317
 Straw-Box Tar Filter for Discharged Gas Liquor (1905) 317
 Tar Filter as a Fitting on Large Carbureted Water Gas Sets (1926) 320
 Tar Filter Boxes for Gas-Liquor Predischage Treatment 320
 Tar Separators 320
 Lampblack Separators 330
 Management of Collected Gas Tars and Tar Residuals 332
 Tar Management Options 332
 Discharge of Tar to the Ground 332
 Exhausters 338
 The Wash Box 340
 Remedial Implications 342
 Condensation 342
 Remedial Implications Related to the Presence of Manufactured Gas
 Condenser Locations 348
 Generalizations about Manufactured Gas Condensers 351
 Remedial Implications of Condenser Use 354
 Washers 354
 Scrubbers 356
 Scrubbers Designed for Particular Removals 357
 Light-Oil Scrubbing 358
 Rotary Scrubbers 358
 Tower Scrubbers 358
 Remedial Implications of Scrubber Utilization 364
 Washer-Scrubbers 366
 Scrubber Doubles as Condenser and Wash Box 366
 Combined Use of Condensers, Scrubbers, and Washers 368

Electrostatic Precipitators	368
Purification and Storage (Chapter 6).....	370
Purifiers	370
Gasholders	371
Summary	371
Chapter 6 Gasworks Components (II): Purification and Storage.....	373
Purification	373
Today's Environmental Impacts of Yesteryear's Purification Activities.....	373
Contaminants and Contamination Associated with Purification and Spent Purifier Media.....	375
Gas Impurities Treated by Purification.....	377
Purification as a Process.....	377
Purifier Design	379
Purifiers as Viewed from the Standpoint of Size and Layout	379
Quantities of Spent Purification Media.....	380
Series Removal of Impurities	380
Sizing of Purifiers.....	380
The Basic Purification Process.....	381
Purifier Trays	385
Purification Media.....	387
Selection of Purification Media Based on Performance and Handling.....	389
Coal-Liming as a Pre-Purification Extender of Media Life.....	390
Lime as a Purifier Medium.....	390
Crushed Sea Shells	393
Crushed Lime	393
Potential Reuse of Spent Purifier Lime	394
Wood Shavings	394
"Oxides"	394
Iron Oxide (Bog Iron Ore).....	395
Iron Strips, Borings, and Filings	395
Proprietary Brands of Prepared Oxide.....	396
Appearance of Spent Iron Oxide in the Gasworks Dump.....	396
A Misnomer.....	397
Preparation of the Shavings/Metallic Particle "Oxide" Mixture	397
Life of Purifier Media.....	398
Spent Purifying Media as a Contaminant.....	401
Purifiers as a Remediation Consideration	402
Contamination around Purifier Boxes.....	403
Fate of Spent Purification Media.....	403
Removal, Collection, and Management of Gas Impurities	403
Hierarchical Steps in the Generation of Gas Plant Wastes: Toxic and Nontoxic... ..	403
Hierarchy of Process Steps	404
Hierarchy of Products, Residuals, By-Products, and Wastes	405
Cyanide Removal.....	406
Gasholders (<i>Gasometers</i>)	408
Purpose and Function of Gasholders	410
Gasholder/Gasometer Design.....	410
Evolution of the Gasholder	411
Important Design Features (for Remedial Engineering Consideration).....	415

Gasholder Tanks (Pits and Basins)..... 423

 Pit Valve Chambers 428

 Remedial Implications of Gasholder Design Type..... 428

Gasholder Types 429

 Gasholders Classified by Function 430

 Commercial Gasworks 430

 Relief Holders 430

 Storage Holders 431

 Distribution Holders 431

 Off-Plant District (Distribution) Holders 431

 Institutional..... 431

 Small Commercial..... 432

 Railyards..... 432

 Gasholders Classified by Design Characteristics 432

 Non-Telescoping 433

 Multi-Lift Gasholders 433

 Slab-on-Grade 433

 Waterless..... 435

 High-Pressure Holders; Spherical and Hemispherical–Cylindrical 436

Construction of Gasholders 437

 Representative Gasholders..... 437

Maintenance of Gasholders 458

Generic Leakage of Gasholder Subsurface Water-Seal Tanks..... 460

 Gasholders Employed for Early Bottled Gas Distribution 464

 “Sediment” in Gasholder Water-Seal Tanks 464

Gasholder Accidents..... 470

Governors 471

 Survival of Holders..... 471

Remedial Implications of Gasholders 474

 A Selection of Gasholder Layout Plots..... 478

Distribution of Manufactured Gas 480

 Gas Mains and Distribution Systems 482

 Gas Plant Distribution System..... 482

 Off-Site Distribution System 483

 Mains and Distribution Pipes 483

 Compressors 484

 Off-Site Gas Storage..... 484

 Meters 484

Summary 485

Chapter 7 Historic Sources, Mechanisms, and Choices Responsible for Coal-Tar Site Contamination..... 487

 Organization of This Chapter..... 487

 Anticipating Residuals and Wastes at Derelict Gas-Plant Sites..... 487

 Discriminating between Coal-Tar Residuals and Petroleum Hydrocarbons..... 488

 Nuisance Odors as an Indication of Pollution Release..... 489

 Case of Margaret Bohan (Respondent) vs. The Port Jervis Gaslight Company ... 491

 Physical and Chemical Nature of Gasworks Contaminants 491

 Organic Hydrocarbons 492

 Petroleum Hydrocarbons 494

Hydrocarbons Found in Diesel Fuels (Oils)	496
Coal-Tar Hydrocarbons	497
Coal-Tar Process Residues as Gas-Manufacturing Contaminants.....	497
Modern Studies of PAH Compounds as Toxic Organic Chemicals.....	499
Impact of the “Appendix VII List” of Priority-Pollutant PAHs.....	499
Regulatory Use of the Appendix VII List of Priority Pollutant PAHs is Scientifically Flawed	503
Dealing with the Flaw Produced by RCRA Appendix VII	504
Nongasification Types of PAHs.....	504
Arguments Featuring Anthropogenic (Non-FMGP) PAHs	504
Potential Confusion over Obsolete PAH Chemical Compound Names.....	505
Coal Distillation versus Coal Carbonization.....	505
Temperature Effects of Carbonization on Nature of Residuals	508
Particular Coal-Tar Residuals as Gasworks Contaminants.....	509
The Light Oils of Coal Tar as Residuals of Gas Manufacturing.....	509
Naphthalene as a Manufactured Gas Residual	509
Light Oils—Monocyclic Aromatic Hydrocarbons—BTEX	518
Naphthalene	519
Naphtha or the Naphtha Cut (A Solvent)	528
Toluol	529
Tars	529
Middle Oils of Coal Tars; the Phenols, Cresols, and Carbolic Oils.....	530
Tar Acids—Phenols and Cresols	530
Heavy Oils—High-Ring PAHs (More Viscous Tars and Creosote Oils)	534
Green Oil (Anthracene Oils).....	534
Residuals Produced by Carbonization of Lignite.....	534
Residuals Typical of the Various Manufactured Gas Processes	534
Residuals Typical of Coal Gas Production.....	534
Tars of Carbureted Water Gas	538
Naphthalene-Residual Tar	539
Gas-Oil Tars	539
Crude Oil Tars of Carbureted Water Gas Generation	539
Residuals Typical of Oil-Gas Production	539
Residuals Typical of Producer-Gas Processes.....	543
Gas Liquors.....	545
Historic Gasworks Management Options for Gas-Manufacturing Residuals.....	546
Gas-Yard Accumulation of Tar Residuals	548
Collection and Direct Discharge	548
Management of Tar Residuals	549
Residuals Separation and Storage	550
Historic Commentary Regarding Gas-Plant Residuals Management	550
Coal Tar as a Gasworks Furnace and Steam Boiler Fuel	553
Burning for Disposal of Unwanted Tars.....	553
As Internal Combustion Engine Fuel	556
Collection, Storage, and Sales	556
Direct Sales.....	557
Rail Shipment	557
Briquettes.....	557
Gasworks Process Components as Sources of Site Contamination.....	558
Gas Holders	558
Tar Extractors	558

Wash Boxes.....	558
All Other Clarification Devices, along with Purifiers.....	559
Gas Works Fluid and Semifluid Residuals and Wastes as Potential Contaminants	559
Clarification Effluent Waters	561
Tars and Tar Sludge	562
Management of Gasworks Tars	562
Tar-Separation Sludge	562
Ammonia	563
Light-Oil Still Wastes	564
Producer Gas-Tar Extraction	565
Gas “Cooler” Water	565
Tar–Water Emulsion, the Troubling Residual-Turned Toxic Waste	565
Treating Tar–Water Emulsions	568
Modern Remedial Implications of Tar–Water Emulsions	569
Oil-Gas Plant Tars	575
Coke-Oven Plant Tars	575
Gas Works Solid Wastes as Potential Contaminants	576
General Remedial Implications of Gas-Manufacturing Residuals and Wastes.....	577
Coke	577
Ash and Clinker.....	577
Spent Purifier Media (Purifier Box Waste).....	579
Spent Purifier Lime	580
Spent Wood Chips and Shavings.....	581
Spent Iron Oxides and Oxide Mixtures.....	583
Cyanide and Cyanogens	585
Prussian Blue-Stained Gravel and Cobbles	587
Ferrocyanides.....	587
Historic Cyanogen Recovery	587
Regulatory Implications of Gasworks Cyanide and Cyanogens	587
Tar Pitches	589
Lampblack	589
Trapping Lampblack in Oil Gas Wash-Box Residuals	589
Breeze	592
Inert Solid Wastes at Gasworks Sites	593
Demolition Waste of Replaced Ceramic Retorts and Brick Benches.....	593
Inert Plant Trash	596
Historic Reuse Options for Gasworks Residuals.....	596
On-Plant Use of Gas Tar as Gas-Plant Fuels.....	596
Burning Tar at the Gasworks, as a Fuel	597
Gas-Plant Accommodations for Off-Plant Sales of Gas Tars	599
Gasworks Dumps and Tar Ponds	600
Detecting and Verifying Gasworks Dumps	600
The Reality of Gasworks Dumps	600
Case Study of Gasworks Nos. 1 and 2, Ramsgate, Kent, the United Kingdom	601
Gasworks Dumping on or into Bodies of Open Water.....	604
Plant-Area Contaminated Sediment.....	605
Tar Ponds as an Historic Residuals Management Option	606
Tar Ponds as the Ultimate Disposal Site for Tar–Water Emulsions	607
Case of the Adamczak Road Gasworks Dump, Manistee, MI.....	607

Fate and Transport of Coal-Tar Residuals.....	608
Source Areas and Associated Waste Types for Characterization Planning.....	609
Waste Types.....	609
Fate at the Plant Site.....	609
Fate of Surface Disposal.....	609
Evaporation.....	610
Weathering and Degradation.....	610
Organic Chemical <i>Fingerprint</i> Association with Source Area.....	610
Historic Knowledge, Legislation, and Litigation over Gas-House Wastes.....	610
By-Product Recovery Operations as Sources of Gasworks Contamination.....	611
Recovery of By-Products.....	611
Recovery of Naphthalene as a By-Product Base.....	612
Inorganic Compounds.....	614
Sulfur.....	614
Ammonia and Its Recovery.....	614
Ammonia Still Wastes.....	615
Recovery of Ammonium Sulfate.....	615
Historic case of Ammonia Scrubber Waste Pollution at Schenectady, NY.....	618
Modern Remedial Implications of Gas-Plant Ammonia.....	620
Solid Wastes That May Mimic Tar Residuals.....	620
Heavy Metals.....	620
Predictable Gas-Yard Sources of Site Contamination.....	621
Management of Condensation and Purification Residuals.....	621
Condensers and Other Fine-Particle Removers.....	621
Coal Gasification Condenser Residuals.....	621
Tar Extractors and Separators.....	621
Tar Extractors.....	622
Relief Holders as a Crude form of Tar Separators.....	625
Water Gas-Tar Separators and Their Overflow.....	626
Overflow from Washers and Washer Scrubbers.....	626
Tar Wells.....	626
Curious Case of the “Migrating” Tar Well, Springfield, MO.....	628
The Function of Tar Wells.....	631
Tar Wells as Discharge Points for Residuals.....	631
Tar Tanks (Surface and Subsurface).....	632
Water-Gas Wash-Box and Carbureted Water-Gas Wash-Box Residuals.....	634
Purifiers.....	634
Leaks, Spills, Drainages, and Direct Discharges as Sources of Site Contamination... 635	635
Drainage of Tar Residuals and Tar Wastes.....	635
Case of Lake Station, a <i>Central Station</i> (AKA “Gasworks Park”), Seattle, WA (1906–1965).....	635
Fluid Leakage from Subsurface Vessels.....	637
Corrosion-Based Leakage.....	637
Chemical Corrosion and Pipe Leaks.....	638
Corrosion of Aboveground Plate Steel Gasholder Water-Seal Tanks.....	638
Electrolytic Corrosion from Stray Trolley-Line Currents.....	640
Off-Site Subsurface Leaks.....	643
Various Coal-Tar Operations as Sources of Contamination.....	643
Recovery of Coke-Oven By-Products.....	643
Collection of Coke-Oven Gas.....	644
Primary Cooler.....	644

By-Products Building	644
Final Cooler and Benzol Washer	644
Variations in Coke Oven Design	644
Remediation Implications of By-Product Coke-Oven Sites	644
World War I and the U.S. Government Toluol Plants.....	644
World War I and the U.S. Government Cellulose Acetate Plants	647
Coal-Tar-Consuming By-Product Industries	647
Coal-Tar Distilleries	652
Nature of the Tar By-Product Distillation Industry.....	654
Coal-Tar Paints and Pipe Dips.....	655
Coal-Tar Pitch.....	655
Coal Tar as Solvent and Fabric Waterproofing.....	657
Coal Tar as a Marine Preservative	657
Coal-Tar Residuals as a Fungicide/Pesticide Base	657
Charcoal Kilns and Wood-Distillation Plants.....	658
Charcoal Kiln Sites.....	658
Wood Distillation Sites	658
Wood-Tar By-Products	659
Remedial Implications of Wood-Tar Sites.....	660
Incandescent Mantle Manufacturing Residue (Thorium)	660
The Fine-Chemical Tar Industry Plants	661
Dye Industry	661
Coal Tar as a Source of Color Dyestuffs	662
Medicinal Tar Compounds	662
Coal-Tar Distilleries as Uncontrolled Hazardous Waste Sites	663
Wood Preservation Facilities as Uncontrolled Hazardous Waste Sites.....	663
Early American Wood Preservation Techniques by Creosote	663
Tar in Wood Preservation	664
Creosote	665
Remedial Implications of Creosote-Based Wood-Treatment Plant Sites	673
Coal Tar as a Road Improvement Product.....	673
Gas Tars in Road Construction.....	673
Historic Road-Tar Developments in Europe.....	675
Historic Road-Tar Developments in America	677
Technical Developmental Aspects of Road-Tar Usage.....	678
Road Paving and Surface Treatment by Prepared Coal Tar.....	679
The Coal-Tar Specialty Industry Producing Road Tars	680
Application of Prepared Coal-Tar Road Improvement Products.....	682
The Final Outcome: Asphalt vs. Road Tar	683
Historic Operational Nuisances and Damages Associated with Manufactured Gas Plants.....	683
State of Knowledge Regarding Gas-Manufacturing Residuals during the Gas-Production Era	684
Summary	684
 Chapter 8 Historic Technical Literature of Manufactured Gas	 689
Introduction	689
Dealing with the Literature	689
Types of Literature Pertaining to Remediation of FMGP Sites	690
What the Literature Reveals Is of Importance to Remediation.....	691

Nature and Dissemination of Remediation-Relevant Gas Industry Literature ...	692
Levels of the Technical Literature.....	692
“Authority” of Literature.....	692
“Absolutes” about the Literature.....	693
Technical Journals.....	694
Applicable Journals to 1960.....	694
Effect of Emerging Natural Gas Activity.....	694
Effect of Post-1930 Shortages in Gas-Manufacturing Feedstocks.....	694
Making Practical Remedial Use of the Literature.....	695
Selected Useful Technical Papers.....	695
Handbooks and Textbooks.....	695
Journals of the Manufactured Gas Industry.....	701
Historic Literature in Microform and Internet Digital Archival Format.....	701
Making Use of the <i>American Gas-Light Journal</i>	708
Related Sanitary Engineering Content of American Journal Papers.....	709
Applicable Governmental Agency Literature.....	709
Other Major Types of Relevant Technical Literature.....	709
Historic Congresses and Expositions.....	710
Regional and National Gas Association Proceedings.....	710
Federal and State Engineering Experiment Stations.....	712
Regional Engineering Associations.....	712
Technical Journals of Allied Industrial Fields.....	712
Commercial Journals of Engineering and Applied Science.....	722
Standard Indices to Engineering and Science Literature.....	722
Brown’s Directory of North American Gas Companies.....	722
Gas Record “Pink Directory”.....	729
Gas Utility Company Archives.....	729
Internal Literature and Documents.....	730
Gas Utility Periodic Operational Reports.....	732
Gas Utility Annual Reports and Employee/Public Relations Magazines.....	732
Gas Utility Operational Documents.....	732
Annual Reports of Corporate Internal Departments.....	737
Annual Reports to Stockholders and to U.S. Government.....	737
General Manager Annual Reports.....	737
Plant Financial Records of Income and Expenditures.....	737
Maps of Generation and Distribution Systems.....	738
Maps of Real Property at Individual Stations.....	738
Contour Maps and Boring Logs for Proposed Station Development.....	738
Layout Maps of Individual Gas Plants and District Stations.....	738
Contract Specifications and Drawings for Plant Components.....	740
Charts of Corporate History.....	744
Charts of Corporate Organizational Management.....	744
Charts of Corporate Executive Responsibility.....	744
Charts of Properties Owned and Controlled.....	746
Biographic Details of Key Personnel.....	746
Corporate Photographic Archives.....	746
Stock Certificate Art of Manufactured Gas.....	749
Environmental-Era Corporate Historical Assessments.....	749
In-House Conclaves.....	749

Utility Industry Public Information..... 749

Role of Universities in Gas Industry Education and Technology Exchange 749

Public Utility Regulatory Agencies..... 753

State Public Utility Regulatory Commissions..... 753

Other State Regulatory Agencies 758

City Ordinances (Franchising) 762

Congressional Anti-Trust Hearings and Reports..... 763

Historical Summaries to the Federal Power Commission 763

Corporate Histories and Monographs of the Newcomen Society 763

Commercial Public Utility Finance, Investment Literature 764

Fire Insurance and Detailed Real-Estate Plat Maps..... 764

Dealing with Sanborn Maps Today 771

Public Sector Sanborn (and Other Related Map) Coverage 771

Private-Sector Sanborn Fire Insurance Maps 772

Plat Maps 773

Bird's-Eye Views 773

Record Keeping 774

Reports of Consultants in Manufactured Gas and Coke..... 775

Engineering Evaluations and Appraisals..... 775

Content of a Typical Historic Consulting Engineering Report 776

Methods of Compilation of Evaluation Reports 777

Companies, Personalities, Consultants, and Experts 777

Municipal Boosterism 779

Gray Technical Literature..... 779

Drawing Deductions from the Gas Literature..... 779

Summary 790

Chapter 9 Site and Waste Characterization for Coal-Tar Contamination	791
Expecting and Predicting the Presence of Former Gas Plants.....	792
Status of American State Agency FMGP Remediation Activities.....	795
History of American Activities in Locating and Remediating FMGPs.....	795
Legal Bases under Which Gasworks Are Remediated	795
Historic Emphases on Gasworks Remediation.....	795
Basis for USEPA Concern for Former Gasworks and Related Coal-Tar Sites.....	796
A Word about “Coal-Tar” Sites, as Related to the RCRA	
Appendix VIII PAHs.....	796
Historic Flaws in CERCLIS Screening.....	796
Research Access to CERCLIS FMGP Sites.....	797
Identification of FMGP Sites via Internet	797
Gaining Access to FMGP Site Environmental Records	797
Proper Importance of NFRAP.....	797
Original USEPA Rationale for NFRAP’ing.....	798
What Can Happen to an NFRAP FMGP?	798
Fate of NFRAP’d FMGPs	799
What Actually Happens to NFRAP’d FMGPs?	799
Other Forms of Terminating Remedial Action	800
Public Utilities as Responsible Parties.....	801
Risk Assessment as Applied to FMGPs.....	802
Coal-Tar Impacts on State Transportation Departments.....	802
State DOT Experience.....	802
What the Transportation Advisory Agencies Have to Say.....	803
Example Circumstances under Which Certain FMGPs Were First	
Discovered	803
Importance of Accurate Site and Waste Characterization	803
Chronologic Assessment of Coal-Tar Operations	803
Guide to Competent Historic Assessment.....	806
Areas for Document Discovery	808
Publications, Formal and Informal.....	809
Analyzing Site Operational Chronology	809
Framework.....	809
Factoring in the Utility Holding Companies	809
Planning and Conduct of Site and Waste Characterization	810
Analysis	813
Evaluation	813
Chemical Characterization of Historic Gas-Manufacturing Wastes	817
Let the Coal Tar Speak for Itself	817
Dealing with the EPA RCRA Appendix VII Coal-Tar Chemicals	821
Conditions of Expected Coal-Tar Loss.....	821
Conditions of Expected Coal-Tar Recovery	821
Source Areas	822
Disposal	822
Gasholders as Sources of Residuals	824
A Rationale for Analyzing Gasholder Locations	825
Fate of Gasworks Residuals and Wastes	826
Fate of Surface Disposal.....	827
Evaporation.....	827
Weathering and Degradation.....	828

Migrated Contamination 828

Detection of Coal-Tar Residuals..... 828

 Phenols as Indicators 828

 Pyrene as an Indicator 829

Guidelines for Prediction of DNAPL Movement 830

Seven Intrinsic Geologic Parameters Controlling Migration..... 831

 Porosity 831

 Permeability (to Coal-Tar Residuals) 831

 Tortuosity (of Flow Channels) 833

 Saturation Percent..... 833

 Heterogeneity (of Sedimentary Character)..... 833

 Entry Pressure (of Infiltrating Groundwater)..... 833

 Capillary Pressure (of Opposing Capillary Fringe)..... 833

 Sum Total of PAH Migration Forces 834

Gross Estimation of Source-Volume Extent 834

Utilization of Geologic Factor Assessment 834

Coal-Tar Residuals in Groundwater 834

Historic Events as Disruptors of Gasworks..... 838

Erroneous Dismissal of PAHs at Undetected Coal-Tar Sites 840

 Livingston, Montana Rail Yards 840

 Case of the Former Atlas Powder Works, near Joplin, MO 840

Geologic Complexities in MGP Site Characterization..... 840

Standard of Care in Site Characterization 841

Respecting and Utilizing Site Technical History 843

Essential Format for the Site Characterization Report 843

 Essential Focuses of a Comprehensive Site and Waste Characterization 847

 Regulatory Consent Orders and Decrees 848

 Evaluation of Consultants..... 848

 Breadth of Experience 849

 Local vs. National Experience..... 849

 FMGP Consultant Selection Process..... 849

 Budgeting..... 850

 Contracting 850

 Managing the Consultant 850

 Integration of Legal Counsel 850

 Work Plans..... 850

Gasworks Contamination 852

 Waste Sources..... 852

 Gas Yard Corrosion as a Source of Leaked Residuals 852

 Gas Plant Source Areas 852

 Waste Disposal Bodies 853

 The Gasworks Dump..... 853

 Box Wastes, in General 857

 Migrated Wastes..... 858

 Iteration of Incoming Field Data 858

 Use of Laboratory Testing 859

 “Fingerprinting” of Tar Affinity and Likely Origin..... 860

Risk Assessment..... 861

 Usual Purpose for Making Risk Assessments of FMGPs..... 861

 ATSDR Participation..... 862

Assessment by Responsible Parties	862
Potential Errors in Risk Assessment	863
Errors and Contentious Issues in FMGP Characterization	863
Site Conceptual Geologic Model.....	864
Errors and Erroneous Concepts.....	864
Erroneous Concepts.....	864
Contentious Issues	866
Need to Employ Multiple Working Hypotheses.....	866
Assumptions	866
Issues of Waste Presence	866
Issues of Fate and Transport.....	867
Chemically Based Excuses for No-Action	867
Issues of Misidentification.....	868
Shortfalls in Scope of Work for Remedial Investigations	868
Legitimate Questions.....	869
Gray Issues, Ghosts, Hearsays, and Fables.....	870
Remediation Planning and Selection of Consultant.....	870
Avoiding Pitfalls in Site Remediation	872
All Consultants Are Not in Fact Equal	872
Priced-Competition Is a Method of Consultant Selection.....	872
Pathway for Characterization and Remediation Decisions	873
Summary	873

Chapter 10 Selection and Construction of Remedy: A Commendation to the “RPM” 875

Introduction	875
Practical Effects of the Voluntary Cleanup Program Movement in America.....	875
Practical Technological Imperatives of Coal-Tar Site Remediation	877
Basic Coal-Tar Site Remediation Steps	880
Documentary History of American Coal-Tar Cleanup	881
Programmatic FMGP Cleanup in the United States	881
Historic Role of the U.S. Environmental Protection Agency in FMGP Cleanup	881
Toxic Gas-Manufacturing Residual and Compounds as a Base Reference in Remedy Selection	888
Conventions for Notation of PAH Contaminant Concentration	888
The Coal-Tar Compounds Viewed from the Standpoint of Public Health.....	888
Dealing with Cyanogens	893
Reference Information on Popularity of Particular FMGP Remediation Technologies	893
Typical Remediation Alternatives for Consideration at FMGPs.....	893
U.S. EPA Records of Decision for FMGPs	893
Selection of Remedy.....	916
Establishing the Site-Knowledge Basis for Selection of Remedy	916
Broad Influences on Selection of Remedy.....	916
Actual Process of Coal-Tar Cleanup in North America.....	917
Examples of Actual North American Cleanup Actions	917
Post-Remediation Land Use of Central Station FMGP Sites	917
Special Attention to Historic Structures Located over Gasworks Toxics	918
Remedial Technologies Particularly Applicable to FMGP Sites	920
Regulatory Classification of Coal-Tar Wastes.....	921

Types of Gasworks Contaminants Subject to Remedial Action 921

 Tars in and about the Gasworks 922

 Dealing with the Multitude of PAH Tar Compounds..... 922

 Cyanogens 923

 Basic Questions to Be Answered for Identified Box Waste Locations..... 923

 Observations Related to Gasworks Cyanogens 924

Potential Risks Associated with Coal-Tar Residuals 925

Selection of Action Levels..... 925

Developing Remedial Objectives 928

 Presumptive Remedies 928

 Air Emissions 928

 Sediment..... 930

 Sheen 931

 Surface Water 932

 Groundwater..... 932

 By Receptor..... 933

Key Chemicals of Concern 933

 Risk-Associated Chemical Makeup of Coal-Tar Residuals..... 934

 Air Emissions as a Remediation Concern..... 934

 Potential Subsurface Releases to Groundwater 935

 Cancer Risk as a Means of Evaluating Specific Coal Tars 935

 Chronic vs. Carcinogenic 935

 Cancer-Based Risk Estimation..... 935

 The Unfortunate Case History of the Taylorville FMGP, IL 936

Selection of Remedial Actions 937

 Selection of Cleanup Level..... 937

Risk-Based Selection of Remedies..... 938

 RBCA Applied to Leaking Underground Petroleum Tank Sites 940

 RBCA as Promoted beyond Leaking Underground Petroleum Tanks..... 940

 Misapplication of RBCA to FMGPs and Other Coal-Tar Sites..... 941

Rational-Basis Selection of Remedy for FMGPs and Other Coal-Tar Sites 941

 Addressing FMGP Residuals in Selection of Remedy 941

 Liquid Gas Plant Residuals and Wastes 941

 Origin of Gas Plant Impurities as Today’s Hazardous Waste 943

 Hazardous Residuals and Wastes of Coke Works and Tar Distilleries 943

 Modern Fate of Historic Residuals and Wastes..... 943

 What We Learn from the Historic Gas Industry Literature..... 943

 What We Need for Selection of Remedy..... 944

 Remediation Imperatives for Accurate Site and Waste Characterization 944

 Avoiding “Junk Science” in Characterizing FMGPs 945

Selection of Remedy..... 946

 Selection of Action Level 947

 In Consideration of Intended Future Land Use..... 947

 By Exposure Scenario 947

 By Risk-Based Corrective Action..... 948

Remedial Alternative Options for Coal-Tar Sites..... 948

 Traditional FMGP *Actions* 948

No Action 948

Institutional Controls 948

Surface Water Controls 949

Groundwater Controls 949

<i>Containment</i>	950
Excavation.....	951
Land Burial.....	951
Resource Recovery	954
Direct Treatment.....	958
Thermal Treatment	959
Thermal Treatment	960
